S. NO	Issues on Form	Remarks
1	Other types of file format can be uploaded while you're clicking the submit button.	Only PDF files should be accepted on the form. Other file types, such as jpg, documents, and csv, should not be accepted.
2	A success message will appear at the top of the form.	A success message should appear at the bottom of the form.
3	When none of the documents are selected and submitted, it does not display any error messages.	When you try to click the upload button without selecting the documents, an error message such as "Please choose the document and submit again." should appear.
4	The success message remains visible after the files have been submitted.	The success message should vanish from the form once a specific amount of time has passed after the files have been submitted.
5	On the same line, there are both input fields and button.	It's not a good idea to place input fields and button on the same line.
6	The "Thank you for uploading the file" messages pop up after reloading the form.	After reloading the form, the message "Thank you for uploading the file" should not appear.
